

Basic Specialized Care

with Jen Bradley

Saturday, September 10th, 9:30 am - 3:30 pm (6 hours)

Central Vermont Medical Center - Conference Room #1

Basic Specialized Care offers important information for understanding the needs of children and families experiencing high degrees of stress. Participants will engage in dialogue regarding risk and protective factors of abuse and neglect in families and how trauma can impact a child's overall development. The role as mandated reporter will be reviewed along with strategies for building healing relationships with children and families. Discussion will include assessing your program's inclusion of children with special health needs and supports that will help you be successful in doing so. This class is required for programs wishing to attain the Basic Specialized Care Provider Status. This training is appropriate for new providers to familiarize them with the many services available in the community.

CDA Areas: #3 & 6; Core Knowledge Areas: Child Development, Healthy and Safe Environments, Professionalism and Program Organization
